

## **NOAA Distinguished Professorship In Coastal Marine Science**

The Environmental Cooperative Science Center (ECSC), a consortium of eight universities, invites applications for the tenured position of NOAA-ECSC Distinguished Professor. ECSC has 5-year cooperative agreement with NOAA to educate a new generation of environmental scientists, particularly from the under-represented minority communities, and to advance the science of coastal ecosystem management. We seek a senior scientist with demonstrated success in coastal marine science research and education, and expertise in ecological processes, integrated risk assessment, and/or ecosystem management. The primary responsibility of the NOAA-ECSC Distinguished Professor is to develop a significant research program that contributes to one or more of the Center's thematic research areas: Integrated Assessment in Support of Environmental Decision Making, Integrated Social Sciences, Ecological Processes and Indicators of Ecosystem Health, and Geospatial Analyses and Data Development. Additionally, the successful applicant will assist with growth and enhancement in research capabilities, educational programs, and opportunities for the Center's faculty and students. The NOAA-ECSC Distinguished Professor will also contribute to the Environmental Science Institute's teaching mission; one graduate level course, guest lectureships, and participation in graduate seminars should constitute about 25% of effort. The successful candidate is expected to have a solid understanding of NOAA core science areas, a demonstrated track record of acquiring and managing extramural research funding, and experience and inter-personal skills necessary to lead interdisciplinary, team-based environmental research.

Applicants must have a Ph.D. from an accredited college or university. U.S. citizenship is required. Applicants should submit a c.v., official degree transcripts, and arrange to have 3 letters of reference sent to: Dr. Larry Robinson, Director, NOAA-ECSC, Environmental Science Institute, Florida A&M University, 1515 South Martin Luther King Blvd., Tallahassee, FL

32307. Please refer to the ECSC website for information about the Center and Florida A&M University (<http://ecsc.famu.edu>). FAMU and ECSC are Equal Opportunity Employers.
